📄 Professional Summary

Third-year B.E. student specializing in Artificial Intelligence & Machine Learning at Sahyadri College of Engineering & Management, with interests in AI/ML, Computer Vision, and software development. Experienced in developing practical solutions through academic projects, hackathons, and open-source initiatives. Active member of the Sahyadri Open Source Community (SOSC), with proficiency in Python, C, Machine Learning, and Data Analysis, and a strong focus on applying technical skills to real-world problems

🎓 Education

B.E. in Artificial Intelligence & Machine Learning Engineering Sahyadri College of Engineering & Management CGPA: 9.44	2024 – present
Department of Pre-University Education St Aloysius PU College Percentage: 92.3%	2024
Class X Delhi Public School, Karnataka Percentage: 79%	2022

📁 Academic & Applied Projects

Sanchar – RuralCare Connect React 18, Vite, Vanilla CSS, Node.js, Express.js, JWT, bcryptjs, PostgreSQL • Built a full-stack digital health platform connecting ASHA workers, PHCs, CHCs and District Hospitals for smart triage routing, real-time referrals, OPD queue management and medicine stock tracking. • Implemented role-based dashboards (Patient, Healthcare Worker, Hospital/Doctor, Admin) with JWT authentication, Kannada/English support and offline action queuing for low-bandwidth rural areas.	2026
AI Crop – Crop Advisory System Python, Flask, Random Forest, Scikit-learn, Pandas • Developed a Flask web app that recommends crops from soil parameters (N, P, K, temperature, humidity, pH, rainfall) using a Random Forest classifier, with simulated soil-image input and a rule-based fallback. • Added a fertilizer advisory module with Gemini API explanations of results.	2025
CrayonAI – Smart Route Planner & AI Search Space Visualizer Python, Flask, OSMnx, NetworkX, React 19, Vite, Leaflet, Recharts, Generative AI • Built a route planner on real OpenStreetMap road data that visualizes how Dijkstra, A*, Greedy Best-First, BFS and DFS explore the network, with live traffic simulation and automatic rerouting. • Created a comparison dashboard with Gemini 2.5 Flash insights and optimized SVG rendering.	2025

🧠 Skills

- **Programming & Development:** Python, C, Java, JavaScript, HTML, CSS, React, Node.js, REST APIs, N8N
- **Artificial Intelligence & Machine Learning:** Statistics, Computer Vision, Data Analysis, AI/ML Model Development
- **Development Practices:** Problem Solving, Data Preprocessing, Model Evaluation, Open-Source Contribution, NLP
- **Tools & Technologies:** Deep learning, Exploratory Data Analysis, OpenCV, Matplotlib, Git, GitHub, Data quality validation

🧩 Leadership & Certifications

Privacy and Security in Online Social Media NPTEL	2026 – present
Introduction to Data Science Infosys Springboard	2025
Social Innovation Program Technical Career Education	2025
Data Structures in C Great Learning Academy	2025
Mentor Hack-Harbor 4.0	2026
